The Canadian Summer School on Quantum Information is now in its 14th year and is proud to bring together students from Canada and other countries to learn about quantum information science. This annual summer school series focuses on educating select early-stage graduate students in a stimulating environment of lectures by world-leading researchers covering leading aspects of quantum information. The lecturers are known not only for being leaders in the field, but also for their strong didactic skills. The lecturers are drawn from the areas of computer science, mathematics, chemistry and physics.
